DETAILED ACTION

Priority

Applicant has not complied with one or more conditions for receiving the benefit of an earlier filing date under 35 U.S.C. 120 as follows:

An application in which the benefits of an earlier application are desired must contain a specific reference to the prior application(s) in the first sentence of the specification of in an application data sheet (37 CFR 1.78(a)(2) and (a)(5)). The specific reference to any prior nonprovisional application must include the relationship (i.e., continuation, divisional, or continuation-in-part) between the applications except when the reference is to a prior application of a CPA assigned the same application number.

Information Disclosure Statement

The information disclosure statement filed 12/10/02 fails to comply with 37 CFR 1.98(a)(2), which requires a copy of each U.S. and foreign patent; each publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the apparatus including beam shaping

Art Unit: 2851

means, positioning means, and shot exposure means (claims 14-21) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 14-21 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The apparatus claimed is not shown anywhere in the drawings, and claimed structural elements of the apparatus such as the positioning means, and the shot exposure means, are not even mentioned within the Detailed Description of the invention. Instead the drawings and Description of the invention are drawn to a method of manufacturing a semiconductor wafer and the structure of the finished wafer. Although the apparatus and its elements are mentioned in the Summary of the Invention, these passages appear only to be included in order to point out advantages of the invention and to summarize the nature and gist of the invention, as is proper within the Summary. A specific description of the preferred embodiment of the apparatus, which

Art Unit: 2851

would enable one of ordinary skill in the art to make and/or use the apparatus, is seen to be lacking in the written disclosure.

Due to the dearth of information regarding the apparatus of the claims throughout the drawings and written description that would allow the Examiner to perform a complete and thorough search of the prior art, the claims have not been further examined on their merits.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to D. Ben Esplin whose telephone number is (703) 305-4022. The examiner can normally be reached on Mon.-Fri. (8am-4:30 pm).
